

Partnering for Green Growth to Accelerate the NDCs

Tuesday, December 10, 13:30 – 14:30 | NDC Partnership Pavilion, Blue Zone | COP 25, Madrid, Spain

Now is the time for action. As the world's population grows and the threats from climate change become more pronounced, there is a US\$26 trillion market-based opportunity to drive green growth and take concrete action on climate change. Public-private partnerships tap into this opportunity.

P4G (Partnering for Green Growth and the Global Goals 2030) accelerates, funds and recognizes innovative partnership-driven projects between governments, businesses and civil society to drive green growth. With funding from Denmark and the Netherlands, P4G is a network of leaders across sectors working to accelerate green growth across the world.

Republic of Korea President Moon Jae-in will host the P4G Seoul Summit in June 2020 to provide an opportunity to strengthen collaboration across the international community to better implement and deliver upon the Paris Agreement and the Sustainable Development Goals.

This NDCP Pavilion side-event will explore how P4G provides practical examples of partnerships that can inspire and link to NDC implementation with the potential to increase the level of ambition by demonstrating concrete action, available financing and investment in these partnerships.
