Dear Colleague

We've had a busy May and June listening to pitches from our second round of prospective startup partnerships and accelerating our current partnerships.

In this newsletter, you'll learn of an upcoming webinar on June 27 that we're co-hosting with WRI Africa on Financing Enterprises for People, Nature and Climate. You'll hear from our partnerships like [African Bamboo](#) and other initiatives like Land Accelerator and TerraFund on the solutions they are implementing, their challenges and lessons learned. [Register here](#).

Later this month, we're looking forward to our National Platforms Gathering. Representatives from our partner countries will come to the Hague to learn from each other and external experts on how best to support climate entrepreneur ecosystems and enable climate finance through these businesses to their countries.

We're looking forward to a knowledge-packed June and will be back to share more next month.

Sincerely,

Sangeetha Sarma
Director of Communications and Engagement, P4G

Pioneering Green Partnerships

African Bamboo

[Register for our Webinar on Financing Enterprises](#)

Climate change is already significantly impacting Africa's ecosystems, economy and society. African countries and development partners are responding to this challenge by implementing climate action across adaptation, mitigation, loss and damage. Locally led climate action can create inclusive, meaningful and sustainable job opportunities for the continent's youth. This webinar, hosted by WRI Africa and P4G, will bring together speakers working in climate businesses, the Kenya Private Sector Alliance and those accelerating sustainable financing models for small and medium enterprises. Speakers will discuss initiatives that enable enterprises in different sectors to thrive for people, nature and climate. [Register today](#) for the webinar on Thursday, June 27 from 9 – 10 am ET/3 – 4 pm EAT.

Zimi Charge

[Zimi Charge - Sustainability Institute](#)

Our partnership Zimi Charge opened an electric vehicle charger outside its office at the Sustainability Institute. The charging station includes a brand new parking lot made entirely of reclaimed bricks. The station will be used as a public charge point for EVs, to charge Zimi's EVs and to contribute to the education initiatives at the SI. Congratulations on this milestone! Learn how the partnership will accelerate the e-mobility transition of fleets in South Africa and provide operators with data to improve performance and efficiency. [Read more.](#)

Forestwise - Yayasan Rimba Raya Abadi

[Forestwise - Yayasan Rimba Raya Abadi](#)

Last week we observed World Environment Day with the focus on "Our land. Our future." When it comes to land restoration, locally-led projects are 6-20x more likely to achieve lasting success. Forestwise – Yayasan Rimba Raya Abadi is one such restoration and climate-smart agricultural partnership we're supporting. The partnership is restoring rainforests in Borneo by creating value for rainforest products like illipe butter which make it more profitable to conserve forests than cut them down. [Learn more.](#)
