Dear Colleague,

As the global climate community prepares to gather in Antalya, Türkiye, for COP31, P4G is looking forward to advancing an important conversation: how do we help promising climate solutions move beyond early-stage innovation to attract investment, reach new markets and scale their impact?

For climate ventures in emerging markets and developing economies (EMDEs), innovative ideas are only the beginning. Strong entrepreneurial ecosystems that provide access to finance, supportive policies and market connections all play a critical role in determining whether a promising business can grow. Strengthening these conditions in a manner that attracts commercial investment is essential to turning innovation into measurable impact. This is where P4G, with our country-led National Platform model focusing on policy and ecosystem improvements, provides a unique value-add.

At COP31, P4G will convene in-person discussions that will explore effective approaches to strengthening climate entrepreneur ecosystems and building a pipeline of investment-ready climate ventures in emerging economies.

On Monday, November 9 from 9:00–10:00 am, the Republic of Korea will host “From Innovation to Scale: Unlocking Finance and Ecosystems for Climate Ventures in Emerging Economies” in the Korea Pavilion. A panel of distinguished speakers will share reflections on the building blocks of startup ecosystems, complementary capital required to strengthen investable venture pipelines, and the partnerships needed to shape the next generation of climate entrepreneurs. To learn more and RSVP, [click here](#).

On Wednesday, November 11 from 10:00–11:00 am, State of Green will host “A New Approach to Scaling Climate Ventures in Emerging Economies” in the Denmark Pavilion. At this side event leaders from government, finance, philanthropy and the private sector will share lessons from P4G’s National Platform model, examine what it takes to build thriving climate startup

ecosystems in emerging economies, and explore a bold new approach to scale funding. To learn more and RSVP, [click here](#).

These conversations come at an important moment for climate finance and entrepreneurship. The lessons P4G has gathered from its startups and institutional research offer an opportunity to rethink how climate ventures are supported, not only to become investment-ready, but also to improve the policies, markets and networks that enable long-term growth.

Will you be attending COP31? We'd love to connect. Please reach out to the P4G team at info@p4gpartnerships.org to arrange a conversation or explore opportunities to collaborate.

We look forward to seeing you in Antalya!

Best regards,

Robyn McGuckin
Executive Director, P4G

Match for Impact: Climate Business Matchmaking 2026

On Monday, October 26, P4G and Mana Impact will host the “Match for Impact: Climate Business Matchmaking 2026” at Temasek Shophouse in Singapore. The event will convene eight high-potential Asian climate-tech startups and 40 Singapore-based strategic partners for three curated 20-minute one-on-one matchmaking rounds. Participants will explore practical opportunities for investment, pilots, procurement, market access, and commercial partnerships. The event will be followed by dinner and networking to support continued collaboration. Investors, corporates, family offices, philanthropies, and other strategic stakeholders are invited to engage with these innovative climate solutions. [Register here](#).

Stride

Forbes Asia 100 To Watch 2026

Vietnamese startups BUYO Solutions and Stride have been featured on the Forbes Asia 100 to Watch 2026, which spotlights promising small companies and startups across the Asia-Pacific region. BUYO Solutions transforms agricultural and food-processing waste into biodegradable alternatives to conventional plastics, while Stride makes rooftop solar more accessible to households and small businesses through flexible financing and insurance. Their recognition reflects the growing momentum behind practical climate solutions that advance circularity and expand access to clean energy. [Learn more.](#)

Irri-Hub KE

60 Decibels 2026 Energy Social Impact Award

Kenyan startups eBee Kenya and Irri-Hub KE were named winners of the 60 Decibels 2026 Energy Social Impact Awards, which recognize leading impact performance in off-grid energy based on customer feedback. eBee Kenya won in the E-Mobility category, while Irri-Hub KE was recognized in Off-Grid Appliances. Their achievements demonstrate how locally led solutions can expand access to cleaner transportation and climate-smart irrigation while improving customers' wellbeing and economic opportunities. BasiGo – Practical Action

BasiGo – Practical Action

BasiGo has partnered with Rubis Energy Kenya to develop a public fast-charging network for electric vehicles across Kenya, extending charging infrastructure beyond Nairobi and along major transport corridors. The first site, at the Rubis Sabaki service station, features 100kW fast chargers designed to serve electric buses, trucks and passenger vehicles. By combining BasiGo's electric mobility expertise with Rubis Energy Kenya's nationwide network of more than 300 service stations, the partnership aims to make intercity EV travel more practical and accelerate Kenya's transition to cleaner transportation.
